BISON's Precision Chucks

BISON's industry-leading SET-TRU fine-adjustment chucks. Featuring four independent radial adjustment screws, these chucks allow fine-tuning of runout down to under 0.0005" T.I.R. Ideal for work that demands pinpoint accuracy, SET-TRU is the gold standard for high-precision turning applications.

BISON's High Accuracy HD Centers

When it comes to turning precision, BISON's R-Series live centers deliver superior concentricity and durability. Built with radial and axial needle bearings and heat-treated bodies, they maintain consistent support even at high RPMs. With TIR held within 0.0002", R-Series live centers provide ultra-reliable part support for high-accuracy machining.

Small Diameter Precision Options

BISON collet chucks are made for small-diameter precision work. Their uniform clamping and low runout provide ideal support for turning, milling, or grinding high-precision cylindrical parts. Multiple types of collet sizes are available from U.S. stock.

BISON Inventory at All Time High

At BISON, we are steadfast in our commitment to maintaining high inventory levels, recognizing that timely delivery is crucial for supporting our customers' operational efficiency. Our dedicated team ensures that your orders ship within one business day, reflecting our unwavering dedication to customer satisfaction. Through strategic inventory management, we not only enhance the value we provide to our customers but also demonstrate our leadership in the precision tooling industry. Furthermore, a significant portion of our US stock is available without added tariffs, reinforcing our competitive pricing and commitment to quality. We invite you to leverage BISON's reliable solutions to enhance your productivity and meet your machining needs with confidence and ease.
